- Free Lifetime Service Maintenance – Polishing, Cleaning, and Nose Pad.

2. Exclusive Corporate Discount

- Up to **30% Store Promotion** + **Additional 10%** Corporate Discount for Branded Frames and Sunglasses.

- **Additional 20%** Corporate discount for Package Promotion.
- **10%** Exclusive Corporate Discount for all Lenses from the Recommended Selling Price.
- **Additional 3%** Exclusive Corporate Discount for all contact lens with T&C apply.

3. Slit Lamp Assessment Test

Slit Lamp Assessment may help detect many different eye diseases which include:

- Cataract – Clouding of the lens of our eyes.
- Conjunctivitis – Redness and inflammation of the thin layer of tissue that covers the front of the eye.
- Corneal ulcer/swelling – Soreness on the cornea that covers the iris and pupil.
- Keratoconus – Cornea thinning and gradually bulging outward into a cone shape that causes blurry vision and sensitivity to light and glare.
- Uveitis – Eye inflammation that affects the middle layer of tissue in the eye wall.
- Contact lens fitting assessment
- Anterior chamber eye health
- Dry-eyes assessment
- Tear duct blockage screening/detection

4. Complimentary Consultation and Eye Health Examination.

- **Free WAVE Analyzer Medica 700 Eye Health Examination (worth RM 200)** will be provided for consultation and eye health examination in our selected outlets.
- Advanced technology that completes eye physiology analysis, vision need assessment and personalized parameters will be used during eye health examination.
The 7 different tests and functions:
 - **Glaucoma Screening & Monitoring** – Detect retinal damage and treat it earlier to prevent vision loss.
 - **Keratoconus Screening** – Helps prevent blurry and distorted vision and can detect corneal structure abnormalities.
 - **Cataract Screening** – Helps detect the clouding of the crystalline lens of the eye
 - **Eye Strain & Near Vision Assessment** – Checks for the eye muscle's near vision focusing ability.
 - **Patient Vision Simulation** – Easy-to-rely day/night simulation of patient's vision with/without glasses to highlight myopic effect at night.
 - **Fully Automatic Non-Contact Solution** – A fully computerized and accurate screening process for eye health without any direct contact with the patient's eyes.
 - **Pupil Diameter Correlation** – Measures pupil size and relates to the refraction (power) in bright and dim conditions.
